Dr. Franklin's Island is a story based on the H.G. Wells' sci-fi classic The Island of Doctor Moreau. I haven't read it yet so I can't make a fair comparison, but I do know it's about some crazy scientist who is working on combining new animal-human hybrids.

Dr. Franklins Island is a very suspensfull book, and it is a very good page turner. When their is a plane crash in the middle of the ocean their are only 3 people who survive the crash. Dr Franklin is very scary and very manipultive of their minds. I like how they turn into the animals that they have always wished they could be.

Today's post comes from National Archives Office of Strategy and Communications staff writer Rob Crotty. All summer long, a group of men huddled in a stifling hot room in Philadelphia (Madison almost passed out from the heat) to develop the framework for a government that would govern the newly independent states of America. There was...

Bifocals are eyeglasses whose corrective lenses contain regions with two distinct optical powers. Benjamin Franklin is credited with the invention of the first pair of bifocals in the early 1760s, though according to the Library Company of Philadelphia, the first indication of Dr. Franklin wearing his double spectacles comes from a political cartoon printed in 1764.
