Comparing the company's promises with what it delivers. It is up to you to verify claims made by a CEO. If a company's CEO says a new product is selling like crazy, take the time to look at its revenue growth and also the accounts receivable turnover in days to ensure customers are buying and actually paying for the goods. If a company claims to have posted record profits, it's up to you to not only verify the claim, but also make sure it wasn't the result of accounting puffery.

Earnings per share (EPS): Neither earnings nor the number of shares can tell you much about a company on its own, but when you combine them, you get one of the most commonly used ratios for company analysis. EPS tells us how much of a company's profit is assigned to each share of stock. EPS is calculated as net income (after dividends on preferred stock) divided by the number of outstanding shares. Price-to-earnings ratio (P/E): This ratio compares the current sales price of a ...
