Islamic geometric patterns are one of the major forms of Islamic ornament, which tends to avoid using figurative images, as it is forbidden to create a representation of an important Islamic figure according to many holy scriptures. The geometric designs in Islamic art are often built on combinations of repeated squares and circles, which may be overlapped and interlaced, as can arabesques (with which they are often combined), to form intricate and complex patterns, including a wide variety of t

[mathrecreation: islamic geometric patterns of Eric Broug](#)

Interesting book, this one. The author aims to describe various geometric patterns in Islamic architecture (there is more focus on architecture than on arts in general; one manuscript painting by Bihzad is described in detail and then a few Quranic pages, though) from Islamic Spain through Morocco (mostly Fez & Marrakesh), Cairo, Baghdad, to Samarkand and Bukhara in Uzbekistan, among other places.

I have 11 books specifically on Islamic geometric design on my shelf excluding this one. The others fall into 3 categories: catalogues of designs with little descriptive text (e.g. Bourgoin "Arabic Geometrical Pattern and Design"), attempts to impose spiritual and religious meaning on to the designs (e.g. Critchlow "Islamic Patterns: An analytical and Cosmological approach"), and analyses that ...

[Eric Broug, Author & Designer - Nomad Inception](#)

The use of geometric patterns in Islamic art can be traced back to rise of Islam during the 7th (Abdullahi & bin Embi, 2013). During the 7th and 8th centuries, floral and vegetal patterns were common. By the 9th century, simple and elementary geometric designs could be observed.
