So I stopped in at Eastwood and ran some beads with both the 175 and the 250 migs. both welded pretty good in mig mode. they did not have any set up for flux core. so I brought one home to give it a spin. the torch is nice, the power cord could be a few feet

longer. anyway I only had a few minutes to play and I do not have a 240v outlet set for that plug. so I ran on the 120v.
