Migration, Settlement and Belonging in Europe, 1500 1930s ...

It explores how the conception of belonging changed over time and space from the 1500s onwards, how communities dealt with the welfare expectations of an increasingly mobile population that migrated both within and between states, the welfare rights that were attached to those who belonged, and how ordinary people secured access to welfare resources.

Migration, Settlement and Belonging in Europe, 1500-1930s ...

Conventional migrant settlement narratives (much like youth transitions conventions, as we explore next) are largely about a sequencing of relationships from dependency within family and migrant community towards an imagined fixed endpoint of integration into wider society (Caglar, 2016). Migrant arrivals are seen to initially rely on family connections in the home country and co?ethnic networks in the host society, then sustained relationships are developed within a group of broader ...

Migration, Settlement and Belonging in Europe, 1500-1930s ...

Since the pre-colonial era, people have moved across the continent for a range of reasons, including the need to seek protection and a desire for socio-economic prosperity. In 2015, Africa had some 21 million international migrants, the majority from other African countries, according to the UN. The post-colonial era engendered new migration dynamics, among them the continuing renegotiation of and fierce struggles over identity and belonging, as a result of increasing contact between ...

How temporary migration is changing Australia   and the world

Conceptions of identity and belonging have been central threads within anthropological research since its inception. These themes also connect us with the interdisciplinary Gender, Race, and Identity (GRI) program at the University of Nevada, Reno. Among our cultural anthropologists, Deborah Boehm works on how both familial and national belongings and identities are entwined with (im)migration …

Book Reviews in: Migration and Society Volume 1 Issue 1 (2018)

A village is a clustered human settlement or community, larger than a hamlet but smaller than a town (although the word is often used to describe both hamlets and smaller towns), with a population typically ranging from a few hundred to a few thousand. Though villages are often located in rural areas, the term urban village is also applied to certain urban neighborhoods.
