[Robert Sapolsky's Profile | Stanford Profiles](#)

Brown algae evolved complex multicellularity independently of the animal and land plant lineages and are the third most developmentally complex phylogenetic group on the planet. An understanding of developmental processes in this group is expected to provide important insights into the evolutionary events necessary for the emergence of complex multicellularity.

[The Technology and Biology of Single-Cell RNA Sequencing](#)

An elegant study by Rakoff-Nahoum and colleagues demonstrated that the recognition of commensal bacteria by TLRs is necessary for protection against gut injury and associated mortality. The very interesting series of experiments of these workers prompts the question whether it is necessary for IEC to be apposed to bacteria, if indeed IEC are ...

[Adenocarcinoma of Mullerian origin: review of pathogenesis](#)

Compared to campus bookstores, more and more students shop Chegg for their college textbooks because of price and convenience. Below are just a few of the benefits students take advantage of when having to get assigned college books for their classes:

[Technology at MSU - Andrew File System Retirement](#)

Using serial blood draws from COVID-19 patients, Su et al. present an extensive multi-omics dataset of plasma and single PBMCs covering the first week of infection following clinical diagnosis, which includes information on plasma proteins, metabolites, and on PBMC transcriptomic and surface-protein data, immune receptor sequences, secreted proteins, and electronic health record data. Their ...

[Telomeric TART elements target the piRNA machinery in](#)

Continued studies on CR, beginning in 1935 with a study in rats by McCay et al. (1935), have consistently shown that CR can facilitate physical fitness, as evidenced by improvements in body mass index, skin condition, liver and kidney function, as well as decreased risk of cardiovascular diseases (Fontana and Partridge, 2015).
