Phenomenology has been practiced in various guises for centuries, but it came into its own in the early 20th century in the works of Husserl, Heidegger, Sartre, Merleau-Ponty and others. Phenomenological issues of intentionality, consciousness, qualia, and first-person perspective have been prominent in recent philosophy of mind.

Phenomenology (from Greek phainómenon "that which appears" and lógos "study") is the philosophical study of the structures of experience and consciousness. As a philosophical movement it was founded in the early years of the 20th century by Edmund Husserl and was later expanded upon by a circle of his followers at the universities of Göttingen and Munich in Germany.

3 Phenomenology seeks to establish a strictly scientific philosophy, but it also has the task of accounting for our life-world and of doing justice to our pre-scientific experience of space, time, and world. 4 Phenomenology is frequently described as a purely descriptive discipline. It describes our experiences just as they are given.
