How an Oasis is Formed An oasis can be formed in many ways. In some cases, it is formed when faulting and climatic conditions create a depression in an arid region. Over a long period, the depression is deepened and enlarged by harsh weather conditions in the desert. The depression deepens further and reaches the water table.

[What is an Oasis in the Desert? - ThoughtCo](#)

An oasis is an unexpected water source located in the desert. This water provides the much-needed relief in the middle of the desert and allows for the growth of vegetation. This isolated vegetation is often how an oasis is identified. Animals often find shelter in an oasis as well, feeding on the surrounding plants and drinking the water supply.

As a mini-biome, the Oasis is not considered to be a separate biome from the Desert as far as most game mechanics are concerned: The Oasis counts as a Desert in terms of an NPC's preferred biome, the Oasis will spawn Desert-exclusive critters and enemies, and fishing in an Oasis will yield the same results as fishing in a Desert. Thus, it is possible to create an artificial Oasis by placing water in the surface layer of a Desert biome.
